KICRO

“KNOWLEDGE AND IDENTIFICATION OF CROP DISEASES FOR SUSTAINABLE FOOD SAFETY”

1ST NEWSLETTER

🌿 Welcome to the First KICRO Project Newsletter! 🌿

Hello and welcome to the first edition of our KICRO Project newsletter! We're excited to share with you the latest updates and progress of our project.

🌍 Project Overview 🌍

The KICRO Project, funded by the Erasmus+ programme, is aimed at providing the fruit-growing sector with tools to improve their knowledge and better identify crop diseases for sustainable food safety. We're in the process of developing an E-learning platform in five languages to make this knowledge accessible to as many people as possible.

>>>>>

🍷 Meet the Team 🍷

Our project is a collaboration between six partners from five countries:

- Międzynarodowa Akademia Nauk Stosowanych w Łomży (Poland),
- Balkan Bridge EOOD (Bulgaria),
- COSVITEC SOCIETA CONSORTILE ARL (Italy),
- REZOS BRANDS ANONYMI EMPORIKI ETERIA IDON DIATROFIS (Greece),
- S.E.A.L CYPRUS (CYPRUS ORGANIZATION FOR SUSTAINABLE EDUCATION AND ACTIVE LEARNING) (Cyprus), and
- The Polish Farm Advisory and Training Centre not-for-profit Sp. z o. o. (Poland).

Each partner brings a unique set of skills and expertise in the fields of agriculture, education, research, and innovation.

🇧🇬 Project Activities 🇧🇬

We're currently engaged in a range of activities, including crop and disease selection, creation of the E-learning platform, training for partners, online pilot test training, dissemination of the project, and planning for multiplier events in each country.

🎉 Project Progress 🎉

We're making great strides in our project. We're in the process of developing an E-learning platform with educational material related to crop diseases, training researchers and technicians. We've also launched our website and social media channels, and are planning for one multiplier event in each country.

Stay tuned for more updates in our next newsletter!
